

Copyright Policy for the Journal of AI Production and Consumption

1. Policy Overview

The Journal of AI Production and Consumption (jAlpc) is dedicated to the open and transparent dissemination of scholarly research. This copyright policy outlines the rights and responsibilities of authors, the journal, and users regarding the published work.

2. Author's Rights (Prior to Submission)

The author(s) warrant that the submitted manuscript is an original work that has not been published previously and is not under consideration for publication elsewhere. The author(s) hold all copyright to the work at the point of submission.

3. Copyright Transfer & Licensing (Upon Acceptance)

Upon acceptance of the manuscript for publication, authors grant JAIPC the exclusive right to publish, reproduce, distribute, and publicly display the article in any format for the full term of copyright.

To maximize the reach and impact of research, all articles in jAlpc are published under a **Creative Commons Attribution (CC BY) 4.0 International License**.

Under this license:

Authors retain copyright of their work.

Anyone (users, researchers, institutions) is free to:

Share — copy and redistribute the material in any medium or format.

Adapt — remix, transform, and build upon the material for any purpose, even commercially.

The user must give **appropriate credit**, provide a link to the license, and **indicate if changes were made**.

This license ensures that authors receive proper attribution and credit for their work while allowing for maximum reuse and adaptation, which is particularly important in the fast-moving field of AI.

4. Author's Post-Publication Rights

Under the CC BY license, authors are granted specific rights to reuse their own work:

Self-Archiving: Authors may deposit the **final published PDF version (Version of Record)** of their article in their institutional repository, on their personal website, or other academic networking sites (e.g., SSRN, ResearchGate) immediately upon publication, with full citation and a link to the article on the jAlpc website.

Reuse in Teaching: Authors may include the work in teaching activities, course packs, and future books or articles they write.

No Embargo Period: There is no embargo period for any form of self-archiving or sharing.

5. Permissions for Reuse (For Third Parties)

Third parties do not need to seek specific permission from the journal or authors to reuse content, provided the terms of the CC BY license are strictly followed. This includes:

Clear attribution to the original author(s).

Citation of the original publication in jAlpc.

Indication of any changes made to the original work.

A link to the CC BY 4.0 license.

6. Responsibilities for Content

Author Responsibility: The author(s) are solely responsible for the content of the article, including the accuracy of facts, statements, and citations, and for securing necessary permissions for any third-party material (e.g., images, figures) included in their manuscript that is not covered by fair use.

AI-Generated Content: Manuscripts must transparently disclose the use of AI tools in their creation process, as per the journal's authorship policy. The human authors are solely responsible for the entire content of the submitted manuscript, including any portions generated by an AI tool, and must ensure it complies with academic integrity standards.

7. Rights of the Journal

The Journal retains the right to:

Edit, format, and prepare the article for publication.

Be identified as the original publisher of the Version of Record.

Take appropriate action (including retraction) in cases of proven scientific misconduct, plagiarism, or ethical violations.

8. Government Employees (US and International)

For authors who are employees of the U.S. or other governments, where the work may be considered a "work of government" and not subject to copyright, the journal accepts that the work is in the public domain. The article will still be published under a CC BY license, and the author must warrant that the work is indeed public domain and that they have the authority to submit it.

9. Policy Changes

The Journal of AI Production and Consumption reserves the right to modify this copyright policy at any time. Changes will not be applied retroactively to articles already published.

10. Contact

For any questions regarding this copyright policy or to request permissions not covered by the CC BY license, please contact the editorial office at: [Insert Email Address].
